Subject: Re: Microsoft agrees to settle private antitrust suits

You people haven't a clue. This will only further the Micro\$oft stronghold on the consumer market! This money should be made available for schools to buy computers and software from competitors like Apple. Apple is the only real competition to MS and it's software domination. Thus it should benefit the competition not offender. This will show students there is still a choice. What sense does it make to say "look there is still only one choice, Micro\$oft. Think about it.
